Supplementary material for *The contribution of the strength and structure of extratropical cyclones to observed cloud–aerosol relationships*

B. S. Grandey, P. Stier, R. G. Grainger and T. M. Wagner

September 19, 2013
Figure S1. Similar to Figure 1, but for Aqua-MODIS aerosol optical depth ($\tau$) over the South Atlantic ocean.
Figure S2. Similar to Figure 3 but for lin–log fits of cloud fraction ($f_c$) versus aerosol optical depth ($\tau$) over the South Atlantic ocean.
Figure S3. Similar to Figure 5, but for lin–lin fits of cloud top temperature ($T_{top}$) versus aerosol optical depth ($\tau$) over the South Atlantic ocean.
