The Graph shows the relationship between temperature ($T$ in °C) and a certain property (FF) for different materials: CNT montmorillonite (Ickes et al., 2017), MOA (Wilson et al., 2015), $n_s$ montmorillonite (Ickes et al., 2017), MOA (based on DeMott et al., 2016), and $n_s$ Saharan dust (Niemand et al., 2012). The graph illustrates how these properties change with temperature.
