Figure 4. ACCMIP ensemble mean bias of surface ozone concentration in ppbv (a) and the ACCMIP ensemble mean error in ppbv (b) over the REF period (2000 time slice) from the historical experiment over the Mediterranean basin. Black and green filled circles represent land and sea, respectively. Brown colors represent positive values of Mean Bias for (a) and Red colors represent relatively large Absolute Error for (b). Blue colors represent negative values of Mean Bias for (a) and relatively small Absolute Error for (b).
