The image contains pie charts showing the distribution of emissions over time for different sectors. The sectors include Power, Industry, Transportation, and Residential.

For each sector, the charts display the emissions in 2015, 2030, and 2050, with the relative contributions from different sources depicted in various colors.

The data for specific pollutants, such as SO2, NOx, BC, and NMVOCs, is also shown over these time periods. The charts illustrate a decrease in emissions from 2015 to 2050, with a particular focus on the reduction in emissions from different industries and sources.
